Advances in
Polymer Technology
Journal of the Polymer Processing Institute

The Polymer Processing Institute (PPI) is an independent research corporation headquartered at Stevens Institute of Technology with laboratories at Stevens and the NJ Institute of Technology. Its mission is to serve industry by advancing the scientific underpinnings of polymer technology through industry-sponsored research, development, and education, and to disseminate information pertaining thereto via all appropriate mechanisms for technology transfer.

Contents of Volume 17

Number 1, Spring 1998

FEATURES

A Comparative Study on the Performance of Three Single-Screw Elements in Melt–Melt Mixing of Immiscible Blends 1
Mohamed Esseghir, Costas G. Gogos, Dong-Woo Yu, David B. Todd, and Benny David

Short Communication—Scale-Up Theory for Twin-Screw Extruder, Keeping the Resin Temperature Unchanged 19
Masami Nakatani

Influence of Pressure on Bulk Density of Polymer Solid Granules at Different Temperatures 23
D. Q. Qiu and P. Prentice

Silane Crosslinking of Plasticized Poly(Vinyl Chloride) 37
M. Fiaz and M. Gilbert

The Influence of Magnesium Hydroxide Morphology on the Crystallinity and Properties of Filled Polypropylene 53
M. Cook and J. F. Harper

Thermal Degradation of Poly(Vinyl Chloride) Plastigels 63
H. İsmet Gökçel and Devrim Balköse

DEPARTMENTS

News of the Polymer Processing Institute 73

Number 2, Summer 1998

FEATURES

Gas Diffusion in Dense Poly(ethylene) Foams 87
B. J. Briscoe and T. Savvas

Comparative Study of Mixing in Corotating Twin Screw Extruders Using Computer Simulation 107
Antoine C. Rios, Paul J. Gramann, and Tim A. Osswald

Stability Analysis in Single Screw Extrusion of Thermoplastic Elastomers Using Simple Design of Experiments 115
Harshad Borgaonkar and Karthik Ramani

Effect of Elastomeric and Plastomeric Tougheners on Different Properties of Recycled Polyethylene 127
Ali Akbar Yousefi, Abdellatif Ait-Kadi, and Christian Roy

Gas Atomization of Polymers. I. Feasibility Studies and Process Development 145
Joshua U. Otaigbe and Jon M. McAvoy

Gas Atomization of Polymers. II. Computational Neural Network Modeling 161
Joshua U. Otaigbe, Donald W. Noid, and Bobby Sumpter

DEPARTMENTS

News of the Polymer Processing Institute 175

Number 3, Fall 1998

FEATURES

Three-Dimensional Viscoplastic FEM Simulation of a Stretch Blow Molding Process 189
Song Wang, Akitake Makinouchi, and Takeo Nakagawa

Development of a compuational Model to Predict Blend Morphology in a Twin-Screw Extruder 203
Do Young Moon and O Ok Park

Prediction of PET Container Properties Using Film Data 217
G. Venkateswaran, M. R. Cameron, and S. A. Jabarin

Effects of Temperature Profiles Through Preform Thickness on the Properties of Reheat–Blown PET Containers 237
G. Venkateswaran, M. R. Cameron, and S. A. Jabarin

Analysis of an Inductively Heated Compression Molding Process 251
Keith Miller and Karthik Ramani

Study of Radiation-Cured Thin Films of Aliphatic and Aromatic Urethane Acrylate Prepolymers 259
M. Azam Ali, Mubarak A. Khan, and K. M. Idriss Ali

DEPARTMENTS

News of the Polymer Processing Institute 269

Announcements 283

Number 4, Winter 1998

FEATURES

Melting Phenomena and Mechanisms in Polymer Processing Equipment 285
Costas C. Gogos, Zehev Tadmor, and Myung Ho Kim

Light Scattering and Optical Microscopy as In-Line Probes of Polymer Blend Extrusion 307
E. K. Hobbie, K. B. Migler, C. C. Han, and E. J. Amis

Melt Rheology of Miscible or Compatibilized Polymer Blends Obtained from Polyamidic and Polyolefinic Polymers 317
E. Turati, A. Vitale, M. Gallazzi, A. Seves, and G. Testa

Antivibration and Vibration Isolation of ENR/CR Blends 329
H.-T. Chiu, T.-C. Cheng, and M.-C. Yang

Simulation of the Stretch Blow Molding Process of PET Bottles 339
J. P. McEvoy, C. G. Armstrong, and R. J. Crawford

Experimental Study on Injection-Charged Compression Molding of Thermoplastics 353
S. Y. Yang and Y. C. Chen

DEPARTMENTS

News of the Polymer Processing Institute 361
